

CLIMATE ADVISORY PACKAGE

Let us help you to
drive **net** profit with
zero emissions

Implementing emissions reduction projects is exciting, but sometimes it can help to have access to experts to help you with your net zero journey.

EXPERT KNOWLEDGE

You may not have the in-house resources to assess, specify and procure emissions reduction projects. It helps to engage experts who can provide valuable input and help develop solutions.

MENTOR

You may need to be able to access an expert quickly to be a sounding board to discuss or exchange ideas with. For example, you may want to discuss future ideas or offers received from suppliers.

QUICK SOLUTION

Often, all that is needed is a quick answer to a problem. Subscribing to Climate Advisory Package means you can ring us and ask, without having to go through a new procurement, saving you time and money.

Subscribing to Climate Advisory Package is totally worth it. It is saving me time, tricky energy issues have become so much easier and I can get decisions verified by experts. An Excel task that would normally have taken me 3 days, only took ½ hour with the help of 100% Renewables. I can't wait to tell the councillors about the savings we have been able to achieve with the streetlighting upgrade!

Sharyn Hunnisett, Environmental Strategies Officer, Lismore City Council

Climate Advisory Package

“Climate Advisory Package” (CAP) will give you access to net zero experts who are readily available and able to provide support on an as-needs basis to respond to a range of support needs or queries.

What are we trying to achieve with Climate Advisory Package?

- Support you with your emissions reduction and net zero needs
- Provide – on average – a few hours of support and advice each month
- Simplify your procurement by providing a low-cost service that can be renewed once you have used your full allocation or full subscription.

How does it work?

- 100% Renewables provides a primary point of contact who will direct our response
- You will provide a contact through whom support requests or queries will be channelled
- Email, phone and MS Teams/Zoom requests are acceptable ways to contact us.
- We will track time spent on your account. At the end of your package, we will provide you with a statement summary, so you can keep track of and assess the value of services.
- While we anticipate that requests for support will be led by you, we will also proactively contact you to enquire about your current needs

What are examples of services that we will provide?

A range of valuable services can be provided within the scope of this agreement, such as:

- Ad-hoc support for your Climate Active carbon neutrality needs
- You want help to develop business cases for reduction projects that you want to implement
- You have received a quotation and want to know whether the cost or savings are accurate
- You want to go to the market for emissions reduction solutions and wish to discuss options and exchange ideas via an online meeting, or to develop technical specifications
- You are unsure how to look at and interpret a load profile and want help to do this
- You want information on a topic relevant to your sustainability goals
- You prepare regular reports for management on your greenhouse gas emissions and action plans and want someone to sense-check the data or information before you publish
- You are interested in including scope 3 emission sources in your carbon inventory and want help to establish your boundary and start collecting data
- You need to present to management and need help with the content or the delivery
- You need a quick desktop assessment of a solar PV opportunity

Pricing

Payment method and schedule

We will send you an invoice at the start of the period. Once payment is received, your balance will be increased with the dollar value of the package you bought.

Timesheet and rates

We will be logging our time against a timesheet using our standard charge-out rates and will submit a detailed timesheet at the conclusion of the CAP service.

Support packages

You have a choice between **'Regular CAP'** or **'Super CAP'** package, depending on how many hours of support you think you may need.

Regular CAP

\$5,000 ex GST

Equals betw. 25 and 30 hours of
support

Payable upfront

Can be renewed

Super CAP

\$10,000 ex GST

Equals betw. 50 and 60 hours of
support

Payable upfront

Can be renewed

Once you have used your full allocation or full subscription, you can simply renew and start again.

SERVICES THAT WE OFFER

Net Zero Strategy

Clear organisational strategy for climate action (mitigation and adaptation), with short, medium and long-term plans.

Carbon Footprint, Climate Active, SBTs

Detailed scope 1, 2 and 3 carbon footprint. Science-based targets. Planning for or accreditation to Climate Active.

Energy Audits and Plans

Type 1, 2 or 3 energy audit of your sites, modelled to your specific needs. Energy efficiency and solar opportunities.

Training and Content Development

Net zero and carbon accounting training, keynote presentations, webinars, development of guides and workshops

Financing Strategy

Cumulative cash flow of your action plan, comparison of financing options, scenario and budget modelling.

Climate Advisory Package

Pay a yearly fixed fee and have access to our energy and carbon experts to help you with technical questions.
