

HOW WE DEVELOP LOW CARBON PROCUREMENT STRATEGIES

THE PROBLEM

Increasing regulatory pressure to report Scope 3 emissions

Meeting emissions reduction targets

Lack of skills/capacity, both internally and within your supply base

Stakeholder pressure

Trailing behind your competitors

ANALYTICS

- › Diagnostic
- › Data analysis
- › Emissions mapping

ENGAGEMENT

- › Introduction workshops
- › Stakeholder engagement
- › Supplier collaboration

ROADMAP

- › Strategy development
- › Targets setting
- › Action plans

ROLL-OUT & IMPROVEMENTS

- › Implementation support
- › Internal capacity building
- › Emissions monitoring

THE PAYOFF

Climate change transition risks are better managed

Improved efficiency and innovation

Enhanced transparency and reputation and meeting stakeholder expectations

Leadership and competitive advantage in the market

Engaged and aligned suppliers

WHAT YOU RECEIVE

- ✓ Diagnostic results and recommendations report
- ✓ Your upstream carbon footprint and projected emissions
- ✓ List of emission sources/hotspots
- ✓ Procurement documents gap analysis

WHAT YOU RECEIVE

- ✓ Executive level buy-in into Low Carbon Procurement
- ✓ Stakeholder workshops
- ✓ Supplier interviews
- ✓ Supplier segmentation and prioritisation

WHAT YOU RECEIVE

- ✓ Low Carbon Procurement opportunities mapping
- ✓ Implementation roadmap
- ✓ Modelling of Low Carbon Procurement contribution to your targets
- ✓ Joint action plans with key suppliers

WHAT YOU RECEIVE

- ✓ Emissions monitoring toolkit
- ✓ Updated procurement documentation
- ✓ Staff and supplier training
- ✓ Progress tracking

Preferred supplier to numerous Government panels

EXCEPTIONAL CLIENT SATISFACTION

With an NPS of over 75, our clients trust and recommend us

CARBON NEUTRAL FIRM

Climate Active carbon neutral certified

KNOWLEDGE HUB

Go-to resource for net zero learning via multimedia content

EXPERT NET ZERO TEAM

Multi-disciplinary specialists designing innovative solutions

OUR STORY AND VALUE PROPOSITION

100% Renewables is a consulting firm that partners with all levels of government, businesses and industry associations to help them decarbonise and prepare for mandatory reporting. Recognising the powerful intersection of business success and climate ambition, we launched the company in 2015 to help organisations *Drive Net Profit with Zero Emissions*.

We solve customer challenges with innovative, whole-of-business decarbonisation solutions. Our nimble, senior-led team sets us apart from larger firms, bringing simplicity and personal commitment to every project. We help businesses by developing customised decarbonisation strategies, integrating sustainability into operations, and ensuring assurance readiness.

OUR VISION

We believe in a future when all organisations are 100% renewable and have zero emissions

OUR MISSION

Driving Net Profit with Zero Emissions

OUR VALUES

Aim high
Always be curious
Act now

OUR DECARBONISED APPROACH

We help organisations decarbonise by building carbon footprints and internal capacity, addressing climate risks and opportunities, developing transition plans, setting targets and preparing our clients for reporting. We also help reduce our customers' value chain emissions by engaging with their suppliers.

Our goal is to be a full-service partner to clients across the spectrum of decarbonisation services and to meet and work with them where they are on that journey.

Whether aiming to lead in sustainability, meet regulatory demands, or embark on their first steps, we empower our clients to achieve their decarbonisation goals, supporting them every step of the way.
