

EXPECTATIONS

Profitable & sustainable
business

Customer & staff
expectations

Reduced
investor risk

Clarity on
climate action

Contribution to
global net zero goal

Target aligned with
maintaining safe climate

PREPARE & ENGAGE

- › Engage key organisational stake-holders to discuss business case
- › Analyse your situation, choose most appropriate SBT approach
- › Select a suitable baseline

WHAT YOU RECEIVE

- ✓ Executive level buy-in and engagement
- ✓ Stakeholders are aligned with your net zero goal
- ✓ Documented SBT method and emissions boundary
- ✓ Included scopes and SBT baseline year

SET TARGETS

- › Calculate comprehensive GHG inventory
- › Develop short-term SBT
- › Develop long-term net zero SBT

WHAT YOU RECEIVE

- ✓ Comprehensive carbon footprint for your business
- ✓ Clarity on whether you need a scope 3 SBT
- ✓ Short-term science-based target and target year
- ✓ Long-term net zero target and target year

DEVELOP STRATEGY

- › Develop net zero strategy
- › Model emissions reduction initiatives to meet targets
- › Align decarbonisation strategy with Sustainable Development Goals

WHAT YOU RECEIVE

- ✓ Abatement pathway out to 2050
- ✓ Staging of cost-effective abatement measures
- ✓ Consensus on the highest priority measures
- ✓ Your core SDGs and alignment to decarbonisation strategy

VALIDATE & COMMUNICATE

- › Target validation by SBTi
- › Communicate target internally and externally
- › Calculate emissions and help you to communicate progress annually

WHAT YOU RECEIVE

- ✓ Sign-off and approval by the Science-Based Target initiative
- ✓ Presentation to internal stakeholders
- ✓ Report which details your targets, strategy, action plans
- ✓ Ongoing help with your annual calculation and comms tasks

THE PAYOFF

Improved profitability
and competitiveness

Increased
innovation

Reduced regulatory
uncertainty

Strengthened investor
confidence and credibility

Future-proofed
growth

Lower emissions,
better reputation

TONNES OF CARBON EMISSIONS

SBTi near-term target:
4.2% emissions reduction p.a.

SBTi long-term target:
Reach at least 90% emissions reduction by 2050

BAU EMISSIONS

Pathway to net zero aligned with SBTi Net-Zero Standard

Buy offsets to reach net zero after your science-aligned emissions reduction

Legend:

- Removal-based offsets
- Stationary energy emissions reduction
- Value chain emissions reduction (inssetting)
- Waste emissions reduction
- Transport energy emissions reduction
- Grid decarbonisation
- Total emissions

ABOUT

100% RENEWABLES

WHAT SETS US APART

TRUSTED GOVERNMENT PARTNER

Preferred supplier to numerous Government panels

EXCEPTIONAL CLIENT SATISFACTION

With an NPS of over 75, our clients trust and recommend us

CARBON NEUTRAL FIRM

Climate Active carbon neutral certified

KNOWLEDGE HUB

Go-to resource for net zero learning via multimedia content

EXPERT NET ZERO TEAM

Multi-disciplinary specialists designing innovative solutions

OUR STORY AND VALUE PROPOSITION

100% Renewables is a consulting firm that partners with all levels of government, businesses and industry associations to help them decarbonise and prepare for mandatory reporting. Recognising the powerful intersection of business success and climate ambition, we launched the company in 2015 to help organisations *Drive Net Profit with Zero Emissions*.

We solve customer challenges with innovative, whole-of-business decarbonisation solutions. Our nimble, senior-led team sets us apart from larger firms, bringing simplicity and personal commitment to every project. We help businesses by developing customised decarbonisation strategies, integrating sustainability into operations, and ensuring assurance readiness.

OUR VISION

We believe in a future when all organisations are 100% renewable and have zero emissions

OUR MISSION

Driving Net Profit with Zero Emissions

OUR VALUES

Aim high
Always be curious
Act now

OUR DECARBONISED APPROACH

We help organisations decarbonise by building carbon footprints and internal capacity, addressing climate risks and opportunities, developing transition plans, setting targets and preparing our clients for reporting. We also help reduce our customers' value chain emissions by engaging with their suppliers.

Our goal is to be a full-service partner to clients across the spectrum of decarbonisation services and to meet and work with them where they are on that journey.

Whether aiming to lead in sustainability, meet regulatory demands, or embark on their first steps, we empower our clients to achieve their decarbonisation goals, supporting them every step of the way.
