

EXAMPLES OF OUR FINANCING OPTIONS AND REVOLVING ENERGY FUNDS EXPERIENCE

Client name	Project type	Year
 PORT STEPHENS COUNCIL	Revolving Energy Fund (REF) Provision of advice regarding implementation of a revolving energy fund (REF), including modelling of potential future scenarios as well as determination of cashflow arising from historical PV projects.	2023
 NSW Department of Planning, Industry & Environment	Revolving Energy Fund (REF) 100% Renewables was tasked by DPIE to develop an Excel-based finance modelling tool, an implementation guide and a pitch deck to senior management, to help councils with implementing a Revolving Energy Fund. Barbara Albert also presented at a council webinar in Nov on implementing the newly developed finance modelling tool.	2020
 NAMBUCCA VALLEY COUNCIL	Financing strategy for renewable energy plan Development of a financing guide for RE/EE programs, analysis and short-listing options for Council, analysis of shortlisted options against Council's RE plan, selection of best-fit financing strategies to maximise returns and expedite implementation of Council's plan.	2018/19
 northern beaches council	Financing options for clean energy 100% Renewables worked with NBC to identify and analyse options for financing their clean energy projects. Options were developed via workshops with Council staff and a proposed financing guide developed based on the outcomes. A final Financing options guide was delivered via webinar to multiple councils participating in OEH/DPIE's Sustainability Advantage program	2018

ABOUT

100% RENEWABLES

OUR STORY AND VALUE PROPOSITION

100% Renewables is a consulting firm that partners with all levels of government, businesses and industry associations to help them decarbonise and prepare for mandatory reporting. Recognising the powerful intersection of business success and climate ambition, we launched the company in 2015 to help organisations *Drive Net Profit with Zero Emissions*.

We solve customer challenges with innovative, whole-of-business decarbonisation solutions. Our nimble, senior-led team sets us apart from larger firms, bringing simplicity and personal commitment to every project. We help businesses by developing customised decarbonisation strategies, integrating sustainability into operations, and ensuring assurance readiness.

We believe in a future when all organisations are 100% renewable and have zero emissions

OUR MISSION

Driving Net Profit with Zero Emissions

OUR VALUES

Aim high
Always be curious
Act now

OUR DECARBONISED APPROACH

We help organisations decarbonise by building carbon footprints and internal capacity, addressing climate risks and opportunities, developing transition plans, setting targets and preparing our clients for reporting. We also help reduce our customers' value chain emissions by engaging with their suppliers.

Our goal is to be a full-service partner to clients across the spectrum of decarbonisation services and to meet and work with them where they are on that journey.

Whether aiming to lead in sustainability, meet regulatory demands, or embark on their first steps, we empower our clients to achieve their decarbonisation goals, supporting them every step of the way.
