ABOUT

100% RENEWABLES

WHAT SETS US APART

TRUSTED GOVERNMENT PARTNER

Preferred supplier to numerous Government panels

EXCEPTIONAL CLIENT SATISFACTION

With an NPS of over 75, our clients trust and recommend us

CARBON NEUTRAL FIRM

Climate Active carbon neutral certified

KNOWLEDGE HUB

Go-to resource for net zero learning via multimedia content

EXPERT NET ZERO TEAM

Multi-disciplinary specialists designing innovative solutions

OUR STORY AND VALUE PROPOSITION

100% Renewables is a consulting firm that partners with all levels of government, businesses and industry associations to help them decarbonise and prepare for mandatory reporting. Recognising the powerful intersection of business success and climate ambition, we launched the company in 2015 to help organisations *Drive Net Profit with Zero Emissions*.

We solve customer challenges with innovative, whole-of-business decarbonisation solutions. Our nimble, senior-led team sets us apart from larger firms, bringing simplicity and personal commitment to every project. We help businesses by developing customised decarbonisation strategies, integrating sustainability into operations, and ensuring assurance readiness.

OUR VISION

We believe in a future when all organisations are 100% renewable and have zero emissions

OUR MISSION

Driving Net Profit with Zero Emissions

OUR VALUES

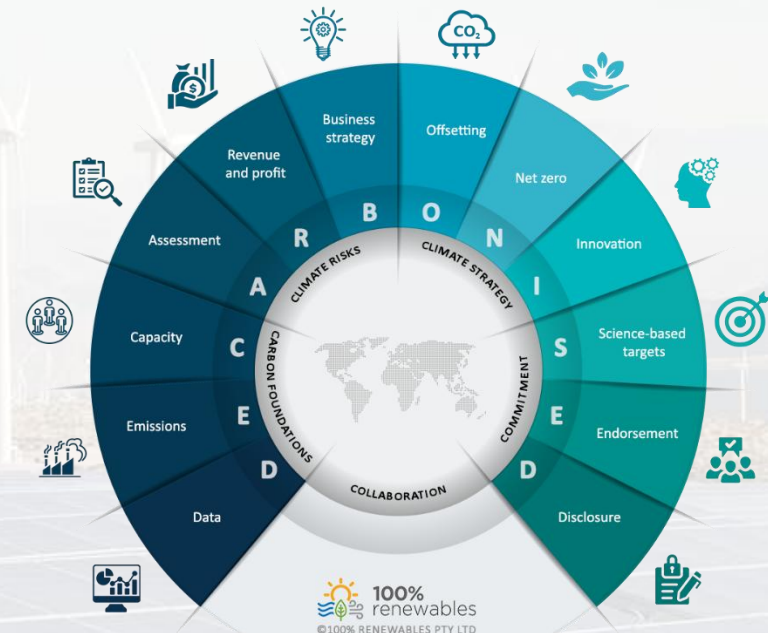

Aim high
Always be curious
Act now

OUR DECARBONISED APPROACH

We help organisations decarbonise by building carbon footprints and internal capacity, addressing climate risks and opportunities, developing transition plans, setting targets and preparing our clients for reporting. We also help reduce our customers' value chain emissions by engaging with their suppliers.

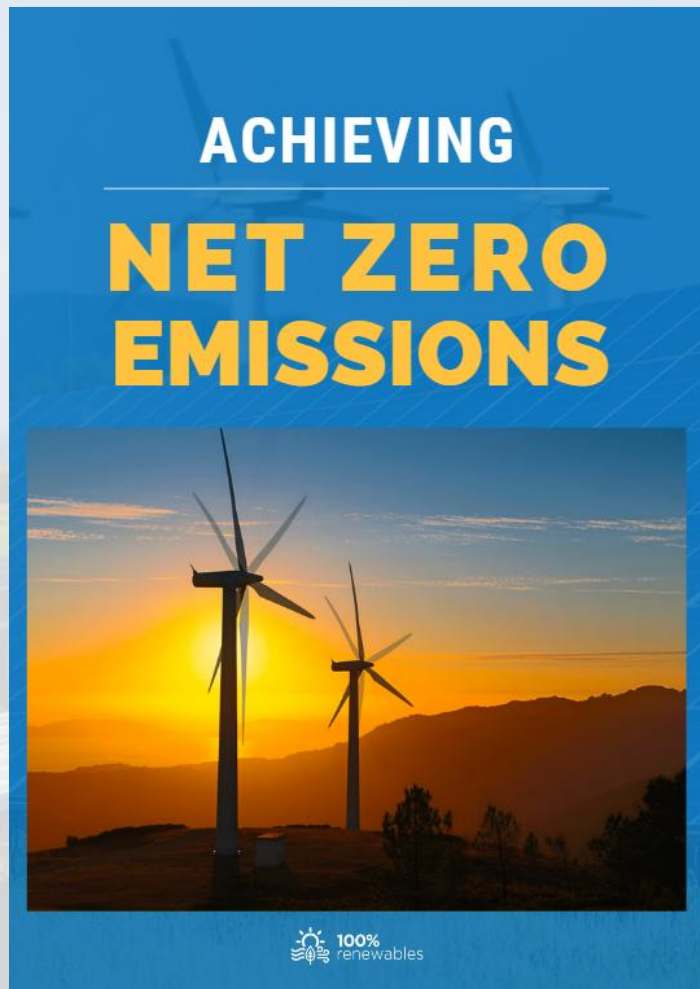

Our goal is to be a full-service partner to clients across the spectrum of decarbonisation services and to meet and work with them where they are on that journey.

Whether aiming to lead in sustainability, meet regulatory demands, or embark on their first steps, we empower our clients to achieve their decarbonisation goals, supporting them every step of the way.

TRAINING AND GUIDE DEVELOPMENT EXPERIENCE

Achieving Net Zero Emissions

100% renewables

WHO CAN YOU TURN TO FOR HELP?

The task to develop your carbon footprint and your net zero journey is not an easy one. We recommend that you get help. The following table will help you with selecting an appropriate provider.

What are you trying to achieve?	Who can you engage?	Local or remote?
Develop your carbon footprint	Sustainability or net zero consultancy	Can be done remotely
Install solar and battery storage	Solar installers	Local
Renewable electricity supply	- Your retailer if you are a smaller company - Your retailer or broker if you are a bigger company	Remote
Develop a net zero strategy	Sustainability or net zero consultancy	Can be done remotely but ideally with some onsite analysis and engagement
Climate Active certification	Climate Active registered consultants	Can be done remotely
Set a target in line with science	Sustainability or net zero consultancy	Can be done remotely

Achieving Net Zero Emissions

100% renewables

WHAT WILL BE YOUR NEXT STEPS?

Reflect back on what you learned today. What will be your next steps? Will you develop your carbon footprint, will you work on a decarbonisation or net zero strategy? Will you investigate going carbon neutral under Climate Active? What else would you be working on?

-
-
-
-
-

HOW WILL YOU TELL YOUR STORY?

As you go down the net zero path, you will experience ups and downs. Some things will go really well, but you may struggle with some challenges. It's important to not give up and keep working towards the outcomes you are seeking.

As you go on this journey, you can share your stories with others so that they can learn from our experience. A good example is our ["Achieving Net Profit With Zero Emissions" Podcast](#). How will you tell your story? How will you tell the world about your net zero efforts, such as on your webpage, your social, your brochures?

Learner Guide - Achieving Net Zero Emissions

This learner guide was used during a two-hour masterclass, which Barbara Albert delivered across Central Queensland to help over 100 SME businesses succeed in an economy that is transitioning to net zero.

HOW TO ACHIEVE NET ZERO EMISSIONS

Net zero is achieved when your organisation's residual emissions are balanced by greenhouse gas removals or offsets.

Working towards net zero means focusing on deep decarbonisation of your business and value chain. When you have maximised your abatement, you use carbon offsets or removals to reach net zero.

How to Achieve Net Zero Emissions

ACHIEVING NET ZERO

The first step is to set a net-zero target [year in line with science](#) and to set the boundary of what emission sources you will include in your net-zero target. Identify the boundary of emission sources reflects material emissions in your operations and your value chain, for example, aligned with the [Climate Action Standard](#). You then move on to develop your carbon footprint, analyse how you will grow over the

next several years, and project your expected future emissions. You develop a [plan to achieve net-zero emissions](#), based on business cases that are cost-effective and staged over time. You plan for the net-zero projects to be delivered to achieve net-zero by the target year. And every year, you keep implementing projects that will bring you closer to your goal.

Our recommended method on how you can achieve net zero

Figure 1: How you can achieve net zero

While this process is the most efficient way to work towards net-zero emissions, your organisation's pathway will be uniquely yours. Achieving net zero may be an iterative process for you. You may start with a carbon footprint that initially only considers scope 1 and 2, or you may begin to implement initiatives without having an overarching strategy in place. Like [Google](#), CEO of NET-ZERO, said in her [recent interview](#), you need to start

somewhere, seek the help of experts and keep going until you reach your goal. In addition to working towards your net-zero target, which will be some time in the future, you can also go carbon neutral right away by [becoming certified under Climate Action](#).

How to Achieve Net Zero Emissions

SET A NET-ZERO TARGET IN LINE WITH SCIENCE

Science-based targets (SBTs) are greenhouse gas emissions reduction targets necessary to meet the goals of the Paris Agreement – to keep global temperature increase within 1.5°C compared to pre-industrial temperature levels.

You can have your science-based target validated by the [Science-Based Targets Initiative \(SBTi\)](#), which offers a credible, globally recognised approach for setting carbon reduction targets. If you employ under 500 people, you can apply to have your target validated under the [streamlined route for SMEs](#).

NEAR-TERM AND LONG-TERM NET ZERO TARGETS

In late 2021, the SBTi released the first global science-based framework for companies to set net-zero targets.

The [Paris Zero Standard](#) defines 'near-term' and 'long-term' science-based targets. For most companies, you must achieve emissions reductions of at least 6.2% p.a. for near-term targets and must reach 90% emissions reductions by 2050 at the latest as your long-term target. To achieve net zero, you can offset

the remaining 10% of your emissions via greenhouse gas removals.

If you are looking to achieve carbon neutrality on the way to net zero, you can [become certified under Climate Action](#).

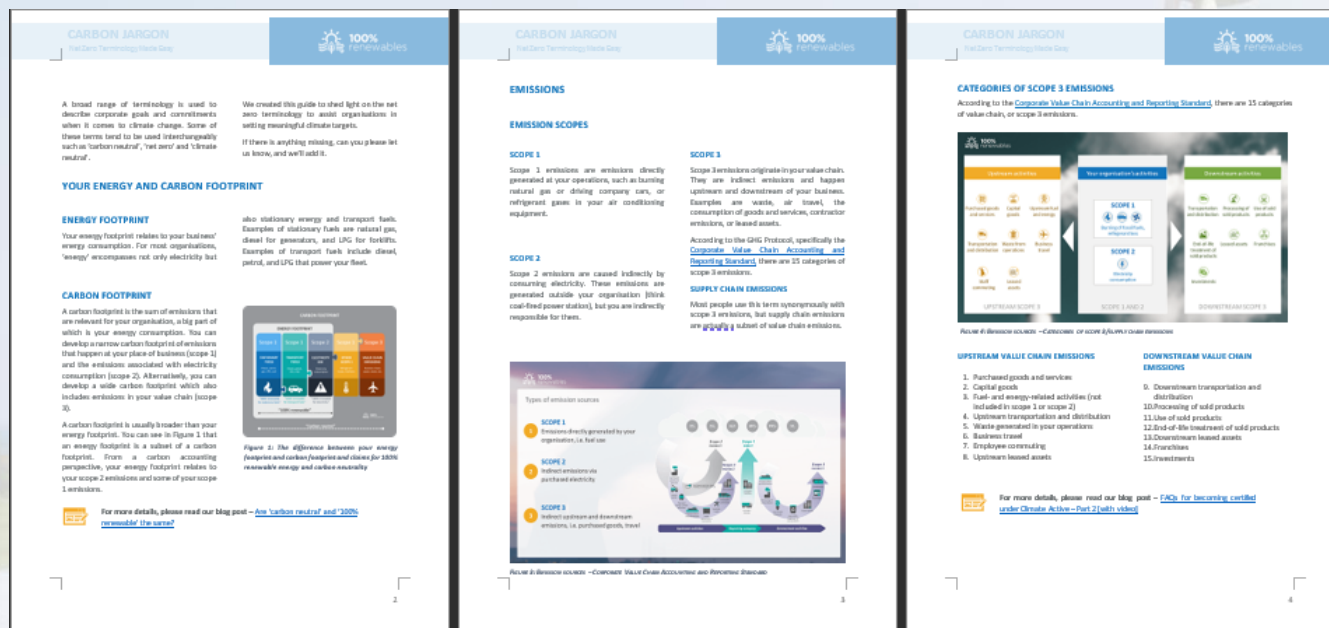

DEVELOPING YOUR SCIENCE-BASED TARGETS

1. [Engage your stakeholders](#) to discuss the business case for setting a science-based target.
2. Analyse your situation and choose the most appropriate SBT approach.
3. Select a baseline year.
4. Calculate your carbon footprint (please refer to the next section in this guide).
5. Set your short-term science-based target for the next 5-10 years.
6. Set your long-term target in line with global net-zero scenarios.
7. Communicate your targets internally and externally.
8. Optional: Get your target validated by the SBTi.

How to Achieve Net Zero Emissions

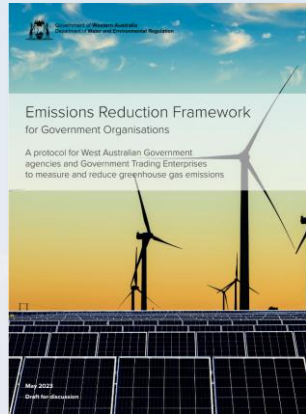

Net zero is achieved when your organisation's residual emissions are balanced by greenhouse gas removals or offsets. Working towards net zero means focusing on deep decarbonisation of your business and value chain. When you have maximised your abatement, you use carbon offsets or removals to reach net zero.

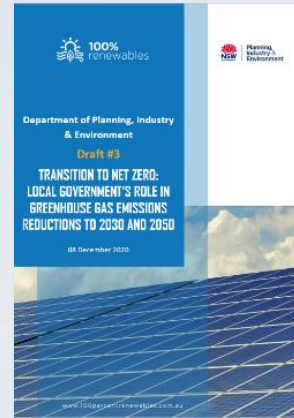

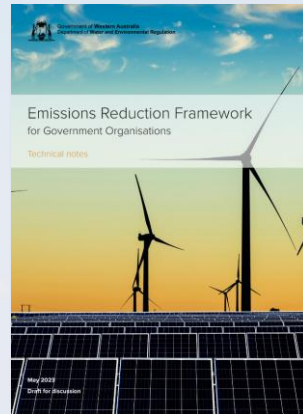

Carbon Jargon: Net Zero Terminology Made Easy

A broad range of terminology is used to describe corporate goals and commitments when it comes to climate change. Some of these terms tend to be used interchangeably such as ‘carbon neutral’, ‘net zero’ and ‘climate neutral’.

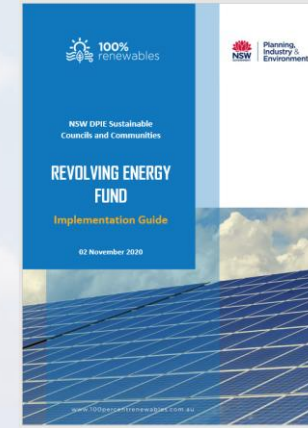

We created this guide to shed light on the net zero terminology to assist organisations in setting meaningful climate targets

What a great series of free events this week by [North Sydney Council](#) - this morning I was fortunate to attend 'Moving towards net zero' with [Barbara Albert \(She/Her\)](#). So grateful to get some clarity on such a complex and overwhelming topic, and actionable next steps for businesses.

A snippet of what I've learnt:

* the difference between Carbon Neutrality (short term interim measures offsetting our ongoing emissions) and Net-zero emissions (long term achievement of having reduced emissions to a bare minimum AND balanced those with removal-based offsets)

* the difficulty of trusting the validity of offsetting solutions: we need to ensure the projects we are funding are additional, permanent and that there is no leakage (Gold standard backed by WWF is a good way forward to protect against accusations of greenwashing)

* the range of actions any business can take is vast, and urgency demands immediate steps even if they are imperfect: don't get deterred by the fact that we don't yet have all the answers on recycling solar panels or EV batteries, we have industries working on those solutions and we need to take a leap of faith / accept current trade-offs, given the imperative to reduce emissions asap.

* we're now at the point where the direct cost and impact of inaction is greater than the cost of action for companies: from international trade implications (especially with the EU since the introduction of the carbon tax), to consumer, employee and investor pressures, all converge in making Net Zero an opportunity for businesses. This transformation is exciting!

Looking forward to diving into your podcast for more [Barbara!](#)
Thanks [Daniella](#) and CitySwitch for this event!

#sustainability #transformation #opportunity #netzero

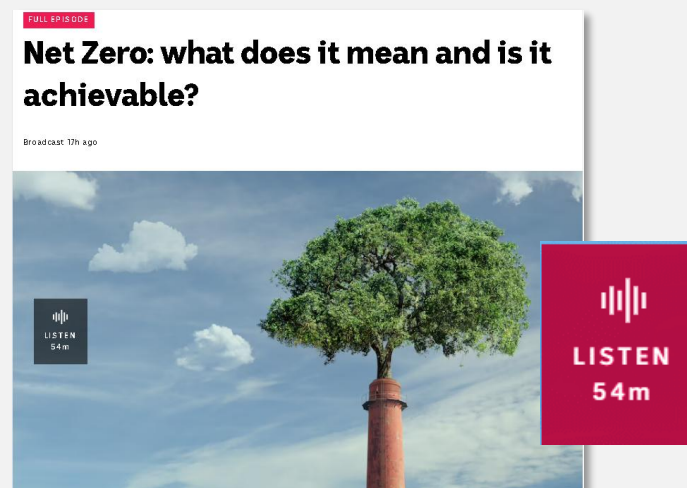

- › Barbara Albert was one of the speakers at QPAC at the "Net Zero: Investing In The Future" event at the [World Science Festival Brisbane \(WSFB\)](#), an annual science festival produced by the World Science Foundation, a non-profit organisation headquartered in New York City, with its Asia-Pacific event being held in Brisbane. She talked about the transition to net zero and the importance of climate literacy, 24 March 2023.

What an outstanding contribution you are making to this important topic **Barbara Albert (She/Her)**. Your understanding of the big picture: supply chain complexities, corporate culture, behaviour change and more, as well as your ability to pragmatically drill down into the detail is just unparalleled. You are an asset to Australia's corporate world, and particularly our manufacturing industry. Thank you for doing what you do and so generously sharing your knowledge.

- Barbara was one of the keynote speakers at the [“Turning the Dial”](#) event, hosted by the [Department of Primary Industries and Regional Development \(DPIRD\)](#) in WA. This two-day event was designed to share insights and expertise on the topics of food waste, sustainable packaging and sustainability beyond an environmental lens. Barbara presented in a workshop on Net Zero and ESG Strategies virtually, 27-28 Feb 2023.

- Barbara Albert was a keynote speaker in ["Towards Net Zero: networking evening"](#) hosted by [Northern Beaches Council](#) (NSW) and shared her insights on Net Zero and the steps businesses can take to reach this important goal, 22 Feb 2023
- Barbara Albert presented a topic on ESG and achieving net zero to the University of Queensland at the [UQ Compliance Network](#) meeting. She covered the topics on SDGs, Times Higher Education Rankings (THE), net zero challenges and opportunities, setting targets, and pathways to achieving net zero, 24 Nov 2022.
- Barbara Albert and Patrick Denvir presented the Ballina Shire Council's Corporate Emissions & Renewable Energy Action Plan in a workshop for the executive leadership team of the council, Oct 2022.

“

Hi Barbara! I just wanted to reach out with another thank you for your amazing work in supporting our Turning the Dial event. Feedback from the event and follow-up feedback since then both point to your workshop as a **key highlight** for the audience.

You absolutely nailed the livestream, engaged the entire audience and cemented your position as a leader in the sustainability and net zero space. Your contribution helped ensure the success of Turning the Dial, and inspired a new generation of sustainability leaders.

Thanks so much again for your support and involvement, we hope to have the chance to work with you and your team again soon.

**KENDAL BECU, PROJECT OFFICER - INVESTMENT SERVICES,
DEPARTMENT OF PRIMARY INDUSTRIES AND REGIONAL
DEVELOPMENT**

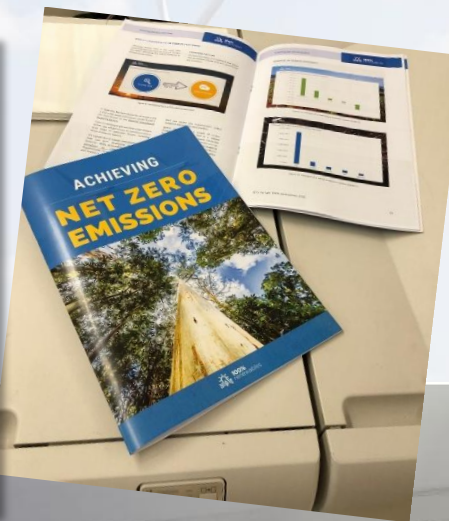

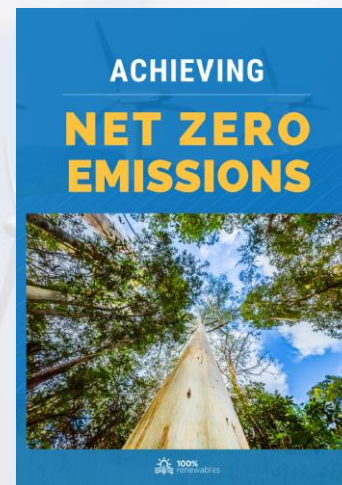

“

Working with Barbara, her presentation was brilliant, content was exactly what we were after, delivered in a very engaging and interesting way. It's always a pleasure working with Barbara and the 100% Renewables team, highly professional and easy to communicate with.

**KIRSTIE RICHARDSON BULL, SUSTAINABILITY OFFICER,
NORTHERN BEACHES COUNCIL**

- Barbara Albert presented to businesses in [Mackay](#), [Emerald](#), and [Gladstone](#) in Central Queensland sponsored by [NBN](#), [Queensland Government](#) and [AusIndustry](#). She kicked off with a keynote on why it is important to move towards net zero, which was followed by presentations from BHP, Rio and Sojitz, each speaking about their own emissions reduction efforts and value chain requirements. Barbara then delivered a two-hour masterclass to help businesses succeed in an economy that is transitioning to net zero. Over 100 SMEs attended, Nov 2022.

NET ZERO Industry Briefing and Masterclass at Mackay

Speakers in Emerald: Ashleigh Kavanagh (CHDC); Stephen Smith (Rockhampton Manufacturing Hub / RDMW); Mick Allen (NBN Co); Barbara Albert (100% Renewables); Adrienne Rourke (AusIndustry); and Anne Houston (Sojitz Blue)

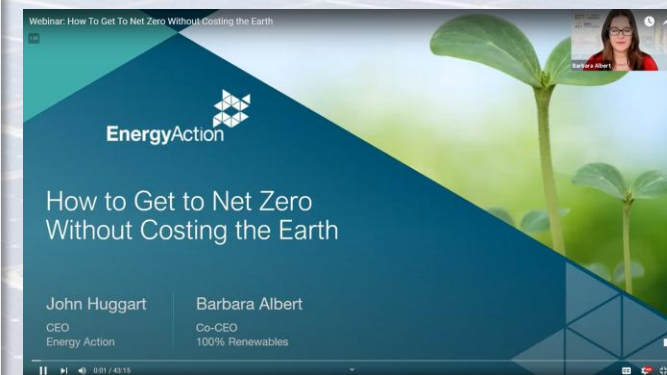

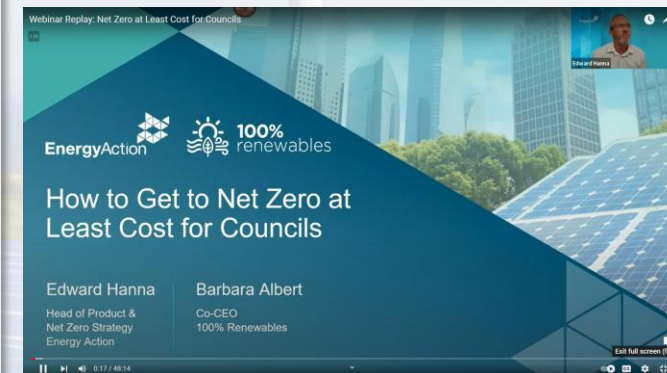

'Net Zero and your business' event at Gladstone

- Barbara Albert delivered a keynote presentation for the online kickoff of "Working towards Net Zero" sponsored by [AusIndustry](#). This event was part of the [Entrepreneur's Programme's](#) Net Zero Smart Project on how you can measure your carbon footprint and develop decarbonisation strategies to be equipped for future net zero supply chains, November 2022.
- Barbara Albert presented on sustainability leadership for universities at an [IRU \(Innovative Research Universities\)](#) event hosted by Western Sydney University to talk about the progress of the university sector on net zero commitments and Australia's performance on THE Impact Rankings for 2022, 30 August 2022.
- Barbara Albert and Patrick Denvir spoke at the [Commonwealth Entrepreneurs Program](#) event and introduced about 60 businesses to net zero and Climate Active carbon neutral strategies and opportunities through the program, 22 Aug 2022.
- Barbara Albert presented at a webinar run by Local Government NSW on "[Revolving Energy Funds: Why you need one and modelling the outcome](#)". Local governments that are interested in setting up a Revolving Energy Fund can get funding from the NSW Government to help them on their journey, 17 August 2022.
- Barbara Albert delivered several net zero trainings to the *Australian Government's Entrepreneurs' Programme* facilitators from Queensland and Western Australia, August 2022.
- Barbara Albert was one of the speakers at the [Accelerate Manufacturing: Western Downs Manufacturing Conference](#) held at the Dalby Events Centre, an event organised by *Western Downs Regional Council*. Barbara talked about strategies for manufacturing businesses to reach net zero, 25 May 2022.
- Barbara Albert was one of the speakers in Part 2 of the webinar series delivered by the *Australian Government's Entrepreneurs' Programme* called "[What does 'Net Zero' mean for Australian small-medium businesses?](#)" in which she explained the fundamentals of net zero to Australian small and medium-sized businesses, 27 April 2022. This was later released in a two-part podcast episode of our '[Driving Net Profit with Zero Emissions](#)'. In the [first part](#) of the recording, Barbara introduced carbon accounting, carbon scopes, calculating your carbon footprint and developing decarbonisation and net zero pathways. In [part 2](#) of this special recording, Barbara introduces important concepts, such as carbon offsetting, carbon farming, and insetting, which are ingredients for a Net Zero or carbon neutral strategy.
- Barbara Albert was one of the speakers in *NSW Government's Sustainability Advantage's Webinar - Councils' Net Zero Emissions*, in which she shared our experience with [developing net zero plans for local governments](#), the growth in net zero commitments for NSW and barriers to local governments committing to and achieving net zero, 06 April 2022

- Barbara Albert had a conversation with Saul Griffith, co-founder and chief scientist at Rewiring Australia and Rewiring America in [“The Big Switch with Saul Griffith: Electrify Everything!”](#) webinar to talk about the general themes around an Australian approach to electrification/renewables with a general discussion on what this would mean politically, environmentally, for individuals and as a nation, 23 March 2022
- Barbara Albert facilitated a webinar to councils in Central NSW Joint Organisation (CNSWJO) on implementing [Revolving Energy Funds](#), a finance modelling tool developed by 100% Renewables under the Sustainable Councils and Communities (SCC) Program of NSW Department of Planning, Industry & Environment (DPIE), February 2022.
- Barbara Albert co-hosted a webinar with Edward Hanna, Head of Product Strategy & Net Zero at [Energy Action](#) called [“How councils can reach Net Zero for least cost”](#), in which they looked at what councils are leading and which options would best help local governments reduce their energy emissions, 09 December 2021.
- Barbara Albert was [a guest and chatted](#) with Jo Taranto of Good for the Hood about how business leaders can translate science into clear sustainability strategies, 17 September 2021.
- Barbara Albert was the main speaker at a breakfast event run by the Sydney Rotary Club called ["Code red" for our climate and how business can act](#). Her presentation talked about the latest IPCC report and the role that businesses can play in achieving the deep emissions cuts needed to maintain a safe climate, 03 September 2021.
- Barbara Albert was one of the speakers in one of the webinar series called [“What does "Net Zero" mean for Australian small-medium businesses?”](#) that leads the ‘Business Decarbonisation Pathways – Working toward Net Zero SMART Supply Chain’ project delivered by the Australian Government's Entrepreneurs’ Programme. She talked about the ‘carbon jargon’, scope 1, 2 and 3 emissions, carbon footprint calculation, decarbonisation solutions and carbon offsets, 26 August 2021.
- Barbara Albert co-hosted a webinar with [John Huggart](#), CEO of [Energy Action](#) called [“How to Get to Net Zero without Costing the Earth”](#), in which they shared advice on how organisations can reach net-zero at lowest cost. Key areas we discussed include boundaries and emissions you should include in your carbon footprint and net-zero ambition, and examples of emissions reduction initiatives, 19 August 2021.
- Barbara Albert was one of the speakers in the *Climate Active new electricity accounting rules* for the Climate Active Program, 20 May 2021.

- › Barbara Albert was one of the speakers in a webinar series conducted by The Net Zero Emissions Implementation (NZEI) team at the Department of Planning, Industry & Environment (The Department) and delivered a presentation on “[Best Practice Climate Action Strategies for Local Governments](#)”. In this session, Barbara showed how engagement at ELT and Councillor level during this process leads to informed decision-makers, adopted plans and ambitious targets, April 2021.
- › Barbara Albert was one of the speakers in a webinar to *Cities Power Partnership (CPP)* member councils about establishing and maintaining Revolving Green Funds. The webinar covered the process of setting them up, the type of projects that can be funded, challenges and lessons learned as well as the demonstration of the Excel tool developed by 100% Renewables for NSW government to model outcomes, March 2021.
- › Barbara Albert facilitated a webinar in November 2020 to councils on implementing [Revolving Energy Funds](#), a newly developed finance modelling tool by 100% Renewables under the Sustainable Councils and Communities (SCC) Program of NSW Department of Planning, Industry & Environment (DPIE), Nov 2020.
- › Barbara Albert was [one of the speakers](#) in the [13th Energy Storage World Forum Virtual Conference](#), 25-27 November 2020. Her talk focused on NSW as a Renewable Superpower and the journey to net-zero.
- › Presentation to the Uniting Church Monthly Synod Emissions Reduction Working Group Meeting on the “Pathway to Net Zero”, Aug 2020.
- › Presentation to the **Maribyrnong community in Melbourne** on emissions trends and barriers to the uptake of renewables, as well as [considerations for the development of climate emergency plans](#), April 2020
- › Barbara Albert presented at the Energy Leaders Forum in Sydney, Nov 2019, where she was also awarded the [Energy Leaders 2019 award](#)
- › Barbara Albert presented at the Renewable Cities Conference in Adelaide, May 2018 - <https://100percentrenewables.com.au/three-case-studies-local-governments-nsw-ramping-renewables/>

PODCAST AND VIDEO CREATION

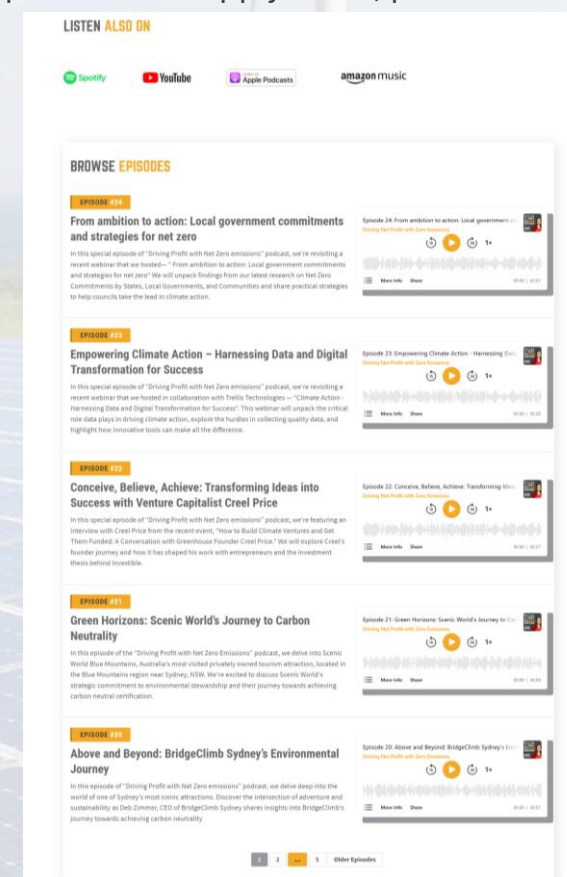

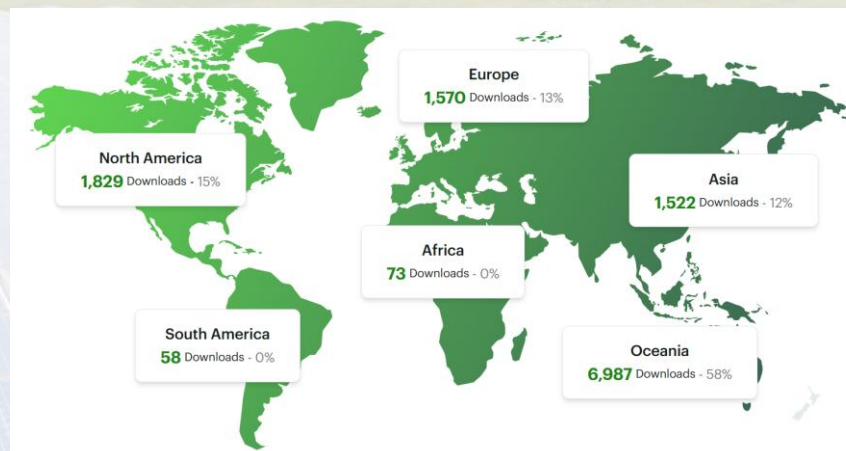

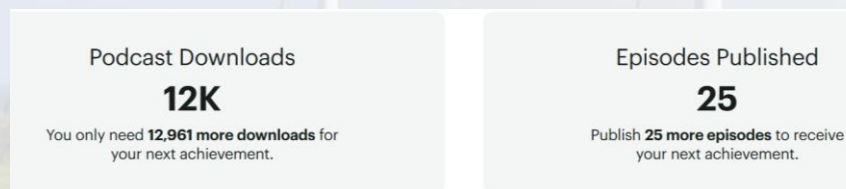

Bringing best-practice and cutting-edge
net-zero emissions stories to you

We have our very own ***“Driving Net Profit with Zero Emissions”*** show - where we showcase best-practice net-zero stories of leading organisations responding to climate change.

Hosted by Barbara Albert, Co-CEO of 100% Renewables, each episode showcases an interview with expert guests from leading climate action companies.

The guests will offer their net zero journey insights across operations & supply chain, products and services, people, branding and climate risk.

We create our own videos - both short or long-form videos on everything carbon and net zero. You can watch our videos [here](#).
